Global: AI Bubble?

Meskipun data ketenagakerjaan AS melemah, probabilitas *rate cut* The Fed bertahan rendah seiring pernyataan *hawkish* Powell sehingga DXY *sideways* & *yield* UST naik. Pasar saham AS melemah akibat larangan ekspor *chip* ke Tiongkok & valuasi yang sudah tinggi meskipun secara fundamental masih solid.

Jobless Jolts

- Rilis data ketenagakerjaan AS cenderung melemah. Meskipun ADP *nonfarm employment change* tumbuh 42,00K (*prev.* -29,00K), pertumbuhan tersebut lebih rendah dibandingkan awal 2025. Di samping itu, jumlah PHK Oktober 2025 mencapai 153,07K, merupakan PHK bulan Oktober terbesar setidaknya dalam 20 tahun terakhir (**Exhibit 1**).
- Pelemahan data ketenagakerjaan seharusnya membuka ruang *rate cut* The Fed. Namun, probabilitas *rate cut* Desember 2025 justru bertahan di 67,00% per 7 November 2025 (1M: 82,00%) akibat komentar *hawkish* Powell yang tidak menjamin *rate cut* di FOMC Desember 2025.
- Alhasil, DXY bertahan tinggi di 99,20 & *yield* UST 10YR sedikit naik ke 4,10% dalam sepekan per 7 November 2025.

Source: Bloomberg (31 October 2025)

Exhibit 2: S&P 500 Sectoral Sales & EPS Growth (%)

Source: Bloomberg (7 November 2025)

Tech Tumble

- Di pekan lalu, ketiga indeks pasar saham AS kompak terkoreksi akibat koreksi pada saham – saham teknologi (*The Mag 7*: -3,21%).
- Katalis negatif datang dari rencana larangan ekspor *chip* Nvidia B30A ke Tiongkok. *Chip* tersebut mempunyai kapasitas 6,00x lebih tinggi dibandingkan H20 yang sudah diperjualbelikan sebelumnya.
- Di samping itu, terdapat kekhawatiran terkait peningkatan *capex* perusahaan teknologi di mana *capex* diproyeksikan dapat mencapai USD 543,00 miliar di 2027 (+139% dari 2024). Peningkatan *capex* dapat menurunkan *free cash flow* perusahaan di tengah valuasi yang sudah sangat tinggi.
- Namun, dibandingkan sektor lain di S&P 500, sektor teknologi menawarkan *growth* yang solid sehingga sulit untuk sepenuhnya ditinggalkan (**Exhibit 2**).

Indonesia: Sorting Priorities

Injeksi likuiditas & kebijakan fiskal akomodatif mendorong pertumbuhan ekonomi namun juga kenaikan inflasi dan pelemahan IDR. Alhasil, *yield* FR bergerak volatil namun IHSG justru *rally* hingga menyentuh *all time high*.

Growth Dilemma

- Rilis data PDB Q3 2025 tumbuh 5,04% YoY (*exp.* 5,00% YoY), didorong oleh kenaikan ekspor & belanja pemerintah.
- Di satu sisi, injeksi likuiditas & kebijakan fiskal akomodatif mendorong pertumbuhan yang lebih tinggi. Namun, di sisi lain, hal tersebut turut mendorong kenaikan inflasi (Oktober 2025: 2,86% YoY) dan pelemahan IDR sehingga mungkin membatasi ruang *rate cut* BI.
- Ketidakpastian dari *rate cut* BI dan aksi *profit taking* membuat *yield* FR 10YR naik ke 6,19%. Namun, *demand* investor domestik yang bertahan solid diharapkan dapat menopang pergerakan *yield* FR ke depannya. Secara YTD per 4 November 2025, baik bank umum, BI & institusi non-bank mencatatkan kenaikan kepemilikan yang signifikan (**Exhibit 3**).

Exhibit 3: Indonesia Bonds Ownership (IDR Tn)

Exhibit 4: LQ45 Monthly Performance (%)

Source: Bloomberg (7 November 2025)

Taking Turn

- Rilis PDB Indonesia yang sesuai ekspektasi membuat IHSG kembali mencetak *all time high* (ATH) di level 8.395 per 7 November 2025, merupakan ATH ke 14x-nya sejak Pak Purbaya dilantik sebagai MenKeu.
- Katalis positif datang dari saham – saham konglomerasi yang kembali *rally* pasca pengumuman MSCI November 2025 di mana BREN dan BRMS berhasil masuk ke indeks MSCI.
- Saham - saham *big cap* (LQ45) melanjutkan *rally* seiring *inflow* investor asing sebesar IDR 3,46 triliun dalam sepekan per 7 November 2025 yang mayoritas masuk ke saham *big cap* (**Exhibit 4**).
- Meskipun saham *big cap rally*, valuasi LQ45 masih relatif rendah dengan *price-to-earnings ratio* di 14,32x (*avg.* 10YR: 16,81x).
