Global: Reality > Expectation

Ekonomi AS bertahan kuat, ditandai oleh revisi naik data PDB Q2-2025 dari 3,30% YoY ke 3,80% YoY serta *core* PCE yang mendekati level tertinggi di 2025. Alhasil, ruang pemangkasan suku bunga The Fed menjadi lebih terbatas, membuat DXY sedikit menguat, *yield* UST kembali naik, dan pasar saham bergerak volatil.

Headwinds for rate cuts

- PDB AS Q2-2025 direvisi naik ke 3,80% YoY, lebih tinggi dibandingkan rilis sebelumnya di 3,30% YoY. Revisi tersebut disebabkan oleh pertumbuhan konsumsi yang lebih tinggi dan pertumbuhan impor yang lebih rendah. The Fed Atlanta GDPNow bahkan memperkirakan pertumbuhan PDB AS di Q3-2025 akan tetap bertahan tinggi di 3,30% YoY.
- Di samping itu, *core* PCE AS dirilis tumbuh 2,90% YoY, mendekati level tertinggi di 2025. Sejauh ini, belum ada tanda bahwa inflasi AS dapat turun mendekati target The Fed di 2,00% setidaknya dalam jangka pendek melihat dampak tarif terhadap inflasi dipercaya belum mencapai puncaknya.
- Per 26 September 2025, pasar masih optimis suku bunga akan diturunkan 25 bps di bulan Oktober 2025 (87,66%), sedangkan kemungkinan penurunan suku bunga sebesar 25 bps di bulan Desember turun ke 65,37% dibanding minggu lalu di 78,60%.

Market reactions

- Menurunnya ekspektasi *rate cuts* membuat DXY *index* sedikit menguat terhadap mata uang lain. Sementara itu, *yield* UST naik di seluruh tenor dalam sepekan per 26 September 2025. Kenaikan paling signifikan terlihat pada tenor pendek yang lebih sensitif terhadap suku bunga.
- Pasar saham AS sempat mencapai rekor tertinggi sebelum terkoreksi akibat *profit taking* dan sentimen negatif dari:
 - Komentar Jerome Powell tentang tingginya valuasi.
 - Implementasi biaya visa H-1B sebesar USD 100.000.
 - Tarif terhadap beberapa komoditas, yaitu *patented drugs* (100,00%), peralatan rumah tangga (50,00%), perabotan (30,00%), dan *heavy trucks* (25,00%), yang berlaku mulai 1 Oktober 2025.

Indonesia: Expansionary Policies

Perlihatkan fokus Indonesia dari *stability* ke *growth* mendorong BI dan pemerintah menerapkan kebijakan moneter dan fiskal yang akomodatif. Alhasil, *yield* FR tenor pendek – menengah naik terbatas sementara IHSG kembali mencetak *all time high*. Keduanya ditopang oleh peran investor domestik ketimbang asing.

Growth over stability

- Di pekan lalu, DPR mengesahkan perubahan APBN di mana target defisit fiskal FY2026 diperlebar dari -2,48% PDB menjadi -2,68% PDB. Beberapa program yang akan menjadi fokus ke depannya adalah Makan Bergizi Gratis, Koperasi Desa Merah Putih, serta ketahanan energi & pangan.
- Tidak hanya dari segi fiskal, kebijakan *pro-growth* juga terlihat dari segi moneter di mana BI telah menurunkan suku bunga sebesar 125 bps YTD September 2025, mengurangi penerbitan SRBI, serta berkomitmen untuk melakukan *burden sharing* dalam rangka membiayai berbagai program pemerintah ke depannya.
- Kombinasi dari kebijakan fiskal & moneter yang longgar membuat IDR melemah ke kisaran 16.700. Namun, tim Ekonom BCA melihat BI masih dapat memangkas suku bunga 25 – 50 bps hingga akhir 2025, tergantung pada volatilitas IDR.

USD/IDR & BI vs. The Fed Rate Differential (%)

USD/IDR, FR 10YR Yield (%), and JCI Movement

Source: Bloomberg (26 September 2025)

Market reactions

- Dalam sepekan, *yield* FR 10YR naik 12 bps ke 6,42%. Kenaikan *yield* relatif terbatas di tengah *outflow* investor asing yang masif yakni IDR 37,93 triliun MTD 24 September 2025. Tenor pendek – menengah mengalami kenaikan *yield* yang lebih besar akibat *profit taking* sementara *yield* tenor panjang cenderung *flat* melihat kepemilikan asing yang sudah jauh lebih rendah di banding 5 tahun terakhir.
- IHSG menyentuh *all time high* di 8.126 per 24 September 2025 meskipun investor asing mencatatkan *outflow* sebesar IDR 2,77 triliun secara MTD per 26 September 2025. Penguatan indeks lebih dikontribusikan oleh saham *small mid cap* yang banyak diakumulasi oleh investor ritel (domestik). Sementara saham *big cap* masih terkoreksi akibat *sell off* investor asing.
