## US: U – Turn

Trump akhirnya memilih Kevin Warsh sebagai pengganti Powell di kursi *chairman* The Fed. Investor justru melihat Warsh sebagai sosok yang cukup *hawkish* sehingga membuat DXY bertahan di 97,00 dan *precious metals* terkoreksi. Di sisi lain, pasar saham AS *sideways* padahal *earnings The Mag 7* cukup solid.

### Trump's Jenga Pick

- Pada FOMC Januari 2026, The Fed menahan suku bunga di 3,75% melihat ekonomi AS yang masih solid dan data ketenagakerjaan yang mulai stabil. Namun, PPI Desember 2025 masih bertahan tinggi di 3,00% YoY (*exp.* 2,70% YoY) akibat kenaikan biaya *trade services & pass-on* tarif impor.
- Trump akhirnya mengumumkan pengganti Powell sebagai *chairman* The Fed, yakni Kevin Warsh. Secara historis, Warsh dikenal *hawkish* terhadap inflasi dan skeptis pada *quantitative easing*. Hingga 30 Januari 2026, pasar masih berekspektasi The Fed dapat memangkas suku bunga 2x FY2026.
- Menjelang akhir Januari 2026, DXY bertahan di 97,00 namun *precious metals* terkoreksi signifikan (**Exhibit 1**). Silver bahkan mencatatkan koreksi harian terbesar sejak 1980. Koreksi emas & silver juga didorong oleh faktor teknikal di mana CME meningkatkan persentase modal untuk *hold position* serta banyak investor yang terkena *margin call*.

### Exhibit 1: Price Movement of Gold & Silver (USD/t.oz)

Source: Bloomberg (30 January 2026)

### Exhibit 2: The Mag 7 1W Return (%)

Source: Bloomberg (30 January 2026)

### Big Spend, Unclear Take

- Pasar saham AS *sideways* dalam sepekan per 30 Januari 2026. Beberapa *The Mag 7* telah merilis *earnings* Q4 2025. Microsoft, Meta, dan Apple merilis *revenue & EPS* yang melebihi ekspektasi namun *revenue* Tesla lebih rendah dari ekspektasi.
- Kinerja *The Mag 7 mixed* (**Exhibit 2**), dengan: 1) Meta (+8,76%) merilis proyeksi *sales* yang tinggi; 2) Apple (+4,61%) merilis penjualan iPhone yang tumbuh 16,00% YoY; 3) Microsoft (-7,65%) merilis pertumbuhan *cloud sales* yang lebih rendah di tengah *capex* yang tumbuh 66,00% YoY.
- Skeptisme investor muncul terkait *revenue* perusahaan *hyperscalers* yang memiliki *capex* tinggi hingga USD 505,00 miliar di tahun 2026 (vs. USD 366,00 miliar di tahun 2025).

2 February 2026

### Asia: Navigating Crosswinds

Pasar saham Asia *rally* seiring *earnings* perusahaan teknologi yang solid. *Rally* indeks teknologi Asia bahkan *outperformed* AS. Namun, penguatan DXY dapat membuat mata uang Asia melemah dan memicu volatilitas. Pasar saham Indonesia justru mengalami *trading halt* akibat potensi penurunan bobot & klasifikasi oleh MSCI.

#### Rising East

- Beberapa perusahaan teknologi Asia turut merilis *earnings* Q4 2025 yang solid. Di Korea Selatan, SK Hynix merilis *revenue* yang tumbuh 66,00% YoY dan Samsung merilis *revenue* yang tumbuh 24,00% YoY, diuntungkan dari tingginya *demand chips* AI. Sentimen positif juga datang dari Samsung yang mulai mengirim *chips* HBM4 ke NVIDIA di Q1 2026.
- Rilis *earnings* & *outlook* perusahaan infrastruktur AI Asia yang solid membuat indeks teknologi Asia *outperformed* AS sejak tahun 2025 (**Exhibit 3**).
- Akan tetapi, risiko dari penguatan DXY (USD index) yang memicu pelemahan mata uang Asia berpotensi membatasi *inflow* asing ke pasar saham Asia.

**Exhibit 3: MSCI APAC ex. Japan IT & Nasdaq YTD Return (%)**

**Exhibit 4: Indonesia's Weight in MSCI Standard Indexes (%)**

**Exhibit 5: Simple Average Return of Old Big Caps & Conglo 7 (%)**

Source: Bloomberg (30 January 2026)

#### MSCI Warning: Hit or Miss?

- Di pekan lalu, IHSG terkoreksi hingga *trading halt* pasca MSCI menilai transparansi pasar saham Indonesia rendah dan membekukan: 1) Peningkatan *Foreign Inclusion Factor* & *Number of Shares*; 2) Penambahan saham ke MSCI *Investable Market Indexes*; dan 3) Migrasi naik segmen indeks. MSCI memberi waktu hingga Mei 2026 dengan risiko berupa: 1) Penurunan bobot di MSCI *Emerging Market* (**Exhibit 4**); dan 2) Penurunan klasifikasi ke *Frontier Market*.
- Hal tersebut memicu koreksi di saham - saham *old big caps* maupun konglomerasi (**Exhibit 5**). Sebagai respon, OJK merencanakan perbaikan berupa: 1) Mengeluarkan *corporate* & *others* dari perhitungan *free float*; 2) Membedah kepemilikan di atas & di bawah 5,00%; 3) Meningkatkan *minimum free float* dari 7,50% ke 15,00%. Danantara, asuransi & dapen, serta BPJS turut menambah porsi saham, khususnya di LQ45. Secara valuasi, indeks LQ45 masih atraktif dengan *forward P/E* di 13,94x (*avg. 10YR* di 16,06x).

## Glossary

- *Capital expenditure*: pengeluaran yang berkaitan dengan pembelian atau pemeliharaan aset tetap seperti lahan, bangunan, dan perlengkapan.
- *Emerging market*: istilah yang digunakan untuk mendeskripsikan negara-negara berkembang seperti Tiongkok, India, dan Indonesia.
- *Forward price to earnings ratio (forward P/E)*: rasio yang digunakan untuk mengukur nilai atau valuasi sebuah perusahaan, dihitung dengan cara membagi harga saham dengan potensi *earnings* dalam 12 bulan kedepan.
- *Free Float*: jumlah saham dari suatu perusahaan publik yang dimiliki oleh investor non pengendali dan tersedia untuk diperdagangkan di pasar saham.
- *Frontier market*: istilah yang digunakan untuk mendeskripsikan negara-negara yang lebih maju dari negara kurang berkembang, tetapi terlalu kecil, berisiko, atau kurang likuid seperti Vietnam, Rumania, dan Kenya.
- *Hawkish*: kebijakan moneter ketat, biasanya ditandai dengan suku bunga tinggi.
- *Margin call*: kondisi ketika harga saham yang dijadikan sebagai jaminan investasi mengalami penurunan, atau transaksi yang dilakukan investor telah melebihi total jaminan yang tersedia.
- *Old big caps*: ASII, BBCA, BBNI, BBRI, BMRI, dan TLKM.
- *Quantitative Easing (QE)*: kebijakan moneter bank sentral untuk menambah likuiditas (jumlah uang beredar). Bisa dilakukan dalam bentuk cetak uang, menurunkan suku bunga, dan menambah *balance sheet*.
- *Revenue*: penjualan.
- 7 Conglo: AMMN, BREN, BRPT, CUAN, DSSA, PANI, dan TPIA.
