New Month, New Target

Eskalasi tensi geopolitik kembali memanas pasca serangan militer AS ke Iran hingga membunuh pemimpin Iran. Sebagai respon, Iran menyerang beberapa negara di Timur Tengah. Kekhawatiran disrupti *supply* minyak membuat harga minyak naik dan investor kembali mengakumulasi *safe haven assets* (emas, DXY, dan UST).

Era of Unrestrained American Power

- Pada 28 Februari 2026, AS dan Israel melakukan serangan militer ke Iran hingga membunuh pemimpin Iran (Ayatollah Ali Khamenei). Penyerangan terjadi pasca Iran menolak untuk menghentikan pengembangan nuklir. Sebagai respon, Iran menyerang beberapa negara di Timur Tengah.
- Sebagai informasi, Iran merupakan produsen minyak terbesar ke 4 di OPEC dengan Tiongkok menjadi pembeli terbesar (~90% minyak Iran). Iran bahkan menjual minyak ke Tiongkok dengan harga yang terdiskon 16% dari acuan.
- Selain itu, di dekat Iran terdapat Selat Hormuz, yakni rute transit penting untuk >20% minyak dunia. Memanasnya tensi geopolitik meningkatkan kekhawatiran terkait disrupti *supply* minyak dunia. Alhasil, harga minyak naik ~13,00% (kenaikan terbesar dalam 4 tahun terakhir) dalam sehari per pembukaan pasar 2 Maret 2026 (**Exhibit 1**).

Exhibit 2: DXY & UST 10YR Yield (%) YTD 2026

Source: Bloomberg (27 February 2026)

Haven-First

- Tensi geopolitik mendorong investor mengakumulasi *safe haven assets* sehingga DXY naik ke 98,00 dan *yield* UST 10YR turun ke 3,93% dalam sepekan per pembukaan pasar 2 Maret 2026 (**Exhibit 2**). Penguatan DXY juga didorong oleh ekspektasi The Fed akan menahan suku bunga akibat inflasi.
- Per Januari 2026, inflasi AS (CPI & PPI) masih berada di atas target. PPI AS tumbuh 2,90% YoY (*exp.* 2,60% YoY) akibat kenaikan margin penjualan peralatan profesional dan komersial. Kenaikan harga komoditas akibat tensi geopolitik juga berpotensi memicu inflasi. Kenaikan inflasi dapat membatasi ruang pemangkasan suku bunga The Fed. Namun, pasar masih melihat The Fed dapat memangkas suku bunga 2x FY2026.

2 March 2026

Woven in Volatility

Risk off sentiment akibat tensi geopolitik dan kekhawatiran disrupsi AI pada bisnis konvensional membuat pasar saham AS terkoreksi. Dampak tensi geopolitik ke pergerakan pasar finansial Indonesia masih relatif minim. Meskipun demikian, beberapa institusi *rating* mulai menyoroti kondisi fiskal di Indonesia.

Fragile Backdrop

- Dalam sepekan per 27 Februari 2026, pasar saham AS terkoreksi seiring *risk off sentiment* dari tensi geopolitik serta kekhawatiran disrupsi AI pasca Anthropic memperluas jangkauan Claude ke sektor lain dan Block me-*layoff* sekitar 50% dari *workforce*.
- The Mag 7* juga terkoreksi meskipun rilis *earnings* Q4 2025 solid (**Exhibit 3**). Koreksi terjadi seiring kekhawatiran investor terhadap tingginya *capex spending* dan *guidance* 2026 yang kurang solid. Nvidia berhasil merilis *earnings* Q4 2025 yang solid dengan *data center revenue* tumbuh 75,00% YoY. Namun, investor justru mempertanyakan kerja sama Nvidia & OpenAI yang belum berproses.
- Katalis negatif juga datang dari Trump yang meminta pemerintahan untuk tidak menggunakan teknologi Anthropic karena menolak memberikan *unlimited access* kepada militer AS.

Credibility on Review

- Reaksi pasar finansial Indonesia terhadap tensi geopolitik AS – Iran masih relatif minim. Dari pasar obligasi, *yield* FR turun di seluruh tenor dalam sepekan per 27 Februari 2026. Padahal, investor asing mencatatkan *outflow* sebesar IDR 3,79 triliun dalam sepekan per 25 Februari 2026.
- Di sisi lain, S&P Global menyatakan bahwa pembayaran bunga Indonesia diperkirakan telah melampaui 15% dari pendapatan. Jika tren tersebut berlanjut ke depannya, S&P Global berpotensi untuk menurunkan *credit rating outlook* Indonesia.
- IHSG *sideways* di 8.235 dalam sepekan per 27 Februari 2026. Investor asing kembali mencatatkan *inflow* dalam 2 minggu terakhir (**Exhibit 4**). *Big banks* merilis *earnings* Januari 2026 yang *mixed* dengan *net profit* BBKA +6,00% YoY, BBNI +3,00% YoY, BMRI +16,00% YoY, sementara BBRI -5,00% YoY.
