Global: Miles Before Peace

Setelah 1 bulan, tensi geopolitik AS – Iran masih memanas pasca aksi saling serang ke fasilitas energi & utilitas. Meskipun AS menunda serangan, Trump kembali mengeluarkan ancaman dan Iran tidak menunjukkan intensi negosiasi. Alhasil, DXY menguat, *yield* UST naik, sementara pasar saham AS terkoreksi.

Eyeing Each Other

- Harga minyak Brent naik ke USD 112,57/barel per 27 Maret 2026 akibat keberlanjutan perang: 1) Selat Hormuz masih terblokir melihat kapal Tiongkok & Thailand tidak diperbolehkan melintas; 2) Penyerangan Iran ke fasilitas aluminium Arab Saudi dan pembangkit listrik serta fasilitas desalinasi air Kuwait; 3) Penyerangan Houthi ke Israel; 4) Penyerangan Israel ke fasilitas senjata & baja Iran.
- Trump sempat membuka negosiasi dan menunda serangan selama 10 hari hingga 6 April 2026. Namun, Trump kembali mengancam untuk menguasai minyak Iran serta berencana mengirim 10.000 pasukan ke Timur Tengah. Sejak awal, Iran tidak menunjukkan intensi negosiasi & menuduh AS merencanakan serangan darat secara diam – diam.
- Alhasil, investor *flight to quality* sehingga membuat DXY naik ke 100,15 sementara memudarnya ekspektasi pemangkasan suku bunga The Fed membuat *yield* UST naik di seluruh tenor (**Exhibit 1**).

Correction Territory

- Pasar saham AS terkoreksi dengan DJIA -0,90%, S&P 500 -2,12%, dan Nasdaq -3,23% dalam sepekan per 27 Maret 2026. Koreksi terjadi seiring ketidakpastian eskalasi tensi geopolitik AS – Iran dan memudarnya ekspektasi pemangkasan suku bunga The Fed.
- Koreksi emiten teknologi justru lebih signifikan sehingga membuat *The Mag 7* (-15,69%) jauh *underperformed* dibandingkan S&P 500 (-7,14%) secara YTD 2026.
- Koreksi membuat *forward P/E* S&P 500 turun ke 19,71x (di bawah rata - rata 5YR) sementara valuasi *The Mag 7* turun ke 23,99x (di bawah -1,00 standar deviasi rata - rata 5YR). *Valuation premium* *The Mag 7* dan S&P 500 turun ke 21,69%, berada di kisaran terendah sejak April 2025 (**Exhibit 2**).

30 March 2026

Indonesia: Steering Through The Storm

Tekanan eksternal membuat IDR melemah & *yield* FR naik. Untuk meminimalisir risiko domestik, Menteri Keuangan menginjeksi likuiditas ke Bank Himbara & pemerintah merealokasi anggaran. Dari pasar saham, investor asing masih *outflow* meskipun terdapat rencana pembagian dividen dari bank – bank besar.

Repairing The Boat

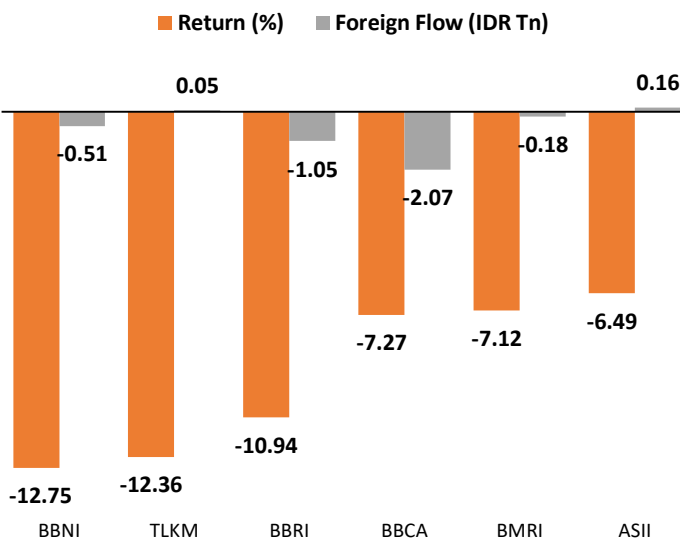

- Penguatan DXY dan kenaikan *yield* obligasi global membuat IDR melemah ke 16.965 dan *yield* FR 10YR naik ke 6,86% (tertinggi dalam 11 bulan) dalam sepekan per 27 Maret 2026.
- Kenaikan *yield* FR juga dipengaruhi oleh: 1) Terbatasnya ruang pemangkasan suku bunga BI melihat potensi kenaikan inflasi akibat perang; 2) Risiko fiskal akibat kenaikan harga energi dan jumlah penerbitan obligasi di 2 bulan pertama 2026 yang mencapai level tertinggi sejak 2015 (**Exhibit 3**).
- Meskipun demikian, Menteri Keuangan telah menambah injeksi likuiditas sebesar IDR 100,00 triliun ke Bank Himbara untuk menjaga *demand* obligasi dan pemerintah berencana melakukan realokasi anggaran sebesar IDR 80,00 triliun dari anggaran Kementerian & IDR 40,00 triliun dari MBG.

Source: Bloomberg (27 March 2026)

Exhibit 4: Old Big Cap Return (%) & Foreign Flow (IDR Tn) 1W as of 27 March 2026

Source: Bloomberg (27 March 2026)

Turning The Tide

- Pasar saham Indonesia (IHSG) cenderung *sideways* di 7.097 dalam sepekan per 27 Maret 2026 pasca libur panjang lebaran di tengah *risk off sentiment* global akibat perang AS – Iran. Investor asing mencatatkan *outflow* sekitar IDR 3,40 triliun dari *regular market* dalam periode yang sama.
- Investor asing banyak mencatatkan *outflow* dari saham *old big cap* khususnya perbankan meskipun terdapat rencana pembagian dividen dengan *yield* sebesar 4,10% (BBCA) dan 5,80% (BBRI). Alhasil, saham – saham *old big cap* terkoreksi di kisaran 7,00% hingga 13,00% dalam sepekan (**Exhibit 4**).
- Koreksi membuat valuasi menjadi atraktif di mana *forward P/E* dari IHSG dan LQ45 turun ke 15,00x dan 10,32x, telah berada di bawah rata – rata 10 tahun. Valuasi dari BBCA (*P/BV*) bahkan telah berada di level terendah sejak COVID-19 yakni di 2,93x.
