## Global: Restless Waves

Harga minyak bertahan rendah akibat pembukaan Selat Hormuz dan peningkatan produksi OPEC+. Namun, kenaikan inflasi dan data ketenagakerjaan yang *mixed* mempertahankan ekspektasi kenaikan suku bunga The Fed. Di sisi lain, *rally* pasar saham AS ditopang oleh beberapa sektor defensif.

### Key Highlights:

- Oil Eases.** Konflik geopolitik antara AS - Iran masih berada di tahap gencatan senjata. Namun, harga minyak Brent & WTI sudah berada di kisaran USD 70,00/barel (*pre-war level*), seiring:
  - *Demand*: Pembelian minyak Tiongkok (konsumen minyak kedua terbesar di dunia) di Mei 2026 turun ke 7,80 juta barel/hari, level terendah dalam 8 tahun.
  - *Supply*: 1) OPEC+ menyetujui peningkatan produksi sebesar 188.000 barel/hari di Agustus 2026; 2) Kenaikan ekspor dari negara non-OPEC; 3) Jumlah kapal yang melewati Selat Hormuz naik ke rentang 46 – 63 dalam sepekan sehingga mendorong penurunan harga komoditas (**Exhibit 1**).
- Hawkish Hold.** Menurunnya harga minyak berpotensi membatasi kenaikan inflasi. Namun, inflasi PCE AS Mei 2026 sudah naik ke 4,10% YoY (*prev.* 3,80% YoY). Di sisi lain, data ketenagakerjaan AS dirilis *mixed* di mana: 1) *JOLTS job openings* tumbuh 7,59 juta (*prev.* 7,58 juta); 2) *Unemployment rate* turun ke 4,20% (*prev.* 4,30%); sementara 3) *Nonfarm payrolls* hanya tumbuh 57,00K (*prev.* 129,00K). Namun, pasar masih melihat potensi kenaikan suku bunga The Fed 1x FY2026 (dimulai di Oktober 2026) sehingga membuat DXY bertahan di 100,86 & *yield* UST naik di seluruh tenor dalam sepekan 2 Juli 2026.
- Sector Rotation.** Pasar saham AS *rally* dengan DJIA +1,97% (*all time high*), S&P 500 +1,76%, dan Nasdaq +2,12% dalam sepekan per 2 Juli 2026. Unikinya, *rally* terjadi di tengah koreksi sektor teknologi akibat: 1) Aksi *profit taking*; 2) Kekhawatiran *AI capex*; 3) Rencana Meta untuk menjual kelebihan *AI computing*; 4) Rencana kerja sama Apple dengan 2 perusahaan Tiongkok; 5) Efisiensi OpenAI; dan 6) Gugatan hukum terhadap Samsung, SK Hynix, dan Micron terkait manipulasi keterbatasan *supply* untuk meningkatkan harga *chips*. Investor justru melakukan rotasi ke sektor yang lebih defensif seperti *healthcare*, finansial, dan *industrials* (**Exhibit 2**).

# Weekly Market Overview

Wealth Management Division

6 July 2026

## Indonesia: Still on Defensive Mode

Defisit neraca dagang, peningkatan inflasi, dan ekspektasi kenaikan suku bunga The Fed memperlebar ruang kenaikan suku bunga BI. Dari segi pasar finansial, *yield* obligasi turun seiring *inflow* asing & *demand* domestik. Namun, terdapat ketidakpastian dari hasil *review* oleh *credit rating agency*.

### Key Highlights:

- 1. Streak Broken.** Di 2026, BI telah menaikkan suku bunga 100 bps ke 5,75%. Tim ekonom memproyeksikan BI masih dapat menaikkan suku bunga 2x hingga akhir 2026. Ruang kenaikan suku bunga BI masih ada melihat:
  - Neraca dagang Indonesia Mei 2026 mencatatkan defisit sebesar USD 1,61 miliar, merupakan defisit untuk pertama kalinya setelah 72 bulan mencatatkan surplus. Defisit didorong oleh penurunan ekspor (-8,30% MoM) yang lebih besar dari penurunan impor (-1,59% MoM). Kombinasi dari defisit neraca dagang & penurunan cadangan devisa dapat menekan pergerakan IDR (**Exhibit 3**).
  - Di sisi lain, inflasi Indonesia Juni 2026 tumbuh 3,34% YoY (*prev.* 3,08% YoY), mulai mendekati batas atas *range* BI di 1,50% - 3,50%.
  - Ekspektasi kenaikan suku bunga The Fed di 2026 juga berpotensi mendorong kenaikan suku bunga BI. Saat ini, selisih suku bunga keduanya berada di 2,00%.
- 2. Steady Demand.** Dalam sepekan per 3 Juli 2026, *yield* FR bergerak turun di seluruh tenor seiring penurunan *yield* SRBI 12M ke 7,67% pada lelang 3 Juli 2026, *inflow* investor asing sebesar IDR 22,60 triliun di Juni 2026 (terbesar dalam 10 bulan) (**Exhibit 4**), dan *demand* domestik yang solid dari BI (IDR 192,59 triliun) serta asuransi & dana pensiun (IDR 36,32 triliun) selama bulan Juni 2026. Meskipun demikian, masih terdapat tantangan pasca Fitch menyatakan bahwa *credit rating* Indonesia berada di bawah tekanan jika cadangan devisa terus menurun. Selain itu, S&P juga akan melakukan *review* untuk *credit rating* Indonesia di Juli 2026.
